UP-25MD

Colour Video Printer

UP-D25MD

Digital Colour Printer

Sony's UP-20 Series has been well received by customers requiring high-quality A6-size colour prints in applications such as ultrasound and endoscopy, and for use in optical camera systems.

Giving customers the additional benefits of an extra-compact design, the UP-D25MD and UP-25MD strengthen this popular lineup of digital and analog printing solutions. As these units are smaller than conventional printers, they fit more easily into space-constrained environments, and can be rack-mounted, alongside other equipment, on medical carts.

With their extra-compact lightweight bodies, the UP-D25MD and UP-25MD are ideal for use in a wide range of medical applications.

UP-25MD
Analog Colour Video Printer

Compact Size

The UP-D25MD and the UP-25MD share a common design. They are the most compact of the UP-20 Series, and are smaller than conventional printers. This means they can fit into smaller spaces and - as their foot positions are identical to those of their predecessors,

the UP-D23MD and UP-21MD, - they even help simplify the task of printer replacement.

The shared dimensions of the UP-D25MD and UP-25MD are approximately 212 (W) x 98 (H) x 398 (D) mm (8 3/8 x 3 7/8 x 15 5/8 inches)

Useful Front Operation and User-friendly LCD Display

The UP-D25MD and UP-25MD are designed with a convenient front panel that enables quick and easy insertion of ribbon cartridges and print media.

Using the front LCD display, users can conveniently operate settings and color adjustment. This display also shows error messages and the print media type, making it easy for users to quickly check and confirm this information.

UP-D25MD (The UP-25MD also has an identical structure.)

UP-D25MD

UP-25MD

Print Media Variation

For additional customer convenience, the UP-D25MD and UP-25MD use the same UPC-21L and UPC-21S print media as other UP-20 Series printers. To meet growing demand for higher image quality and durability, the UP-D25MD and UP-25MD also use UPC-24LA and

UPC-24SA self-lamination media. This type of media has a protective layer on each print, which is resistant to light, heat, water, humidity, and fingerprints. It therefore offers long-term durability and higher image quality.

Superb Print Quality and Colour at 423dpi Resolution

Incorporating dye sublimation printing technology from Sony, the UP-D25MD and UP-25MD can provide photorealistic quality prints with a high resolution of approximately 423dpi image reproductions.

Split-image Prints

Two- or four-split images can be printed on a single sheet. With the UP-D25MD, this is selectable from the printer driver.

Colour Adjustment and Gray Balance (Colour Balance*1)

The UP-D25MD and UP-25MD incorporate two types of colour adjustment function: the normal RGB adjustment and an HSV function. The HSV function enables users to adjust the hue, saturation and value of a selected colour only. With the UP-D25MD, users can check the adjustment result in a preview window on the printer driver GUI*2. In addition the UP-D25MD and UP-25MD can print a nine-split image for colour balance which makes it easier for users to select the best colours (the ones that most closely match user requirements) with actual medical images. As well as simplifying selection, these adjustment functions provide the most suitable tonal range for various modalities.

*1 The UP-25MD uses the function name of Colour Balance *2 For reference

Other features

UP-D25MD

USB Interface

This printer is equipped with a USB 2.0 interface as standard.

PC Compatibility

A PC utility driver software kit is bundled with the printer to enhance its flexibility. This software is compatible with Microsoft® Windows® 2000, XP, and Vista.

UP-25MD

HDTV Signal Support

The UP-25MD supports HDTV (high-definition television) signal input. It accepts both 1080i and 720p signal types, and can automatically discriminate the input signal type.

Supported signals for the RGB/YPbPr/SYNC connectors

NTSC setting: 480/59.94i (SD), 1080/59.94i, 720/59.94p

PAL setting: 576/50i (SD), 1080/50i, 720/50p

Supplied accessories	CD-ROM (1) (Printer Driver, Operating Instructions (PDF) 21 Languages), HDTV IN/OUT signals 1080i/59.94i, 1080/50i (2:1 interlace) 720/59.94p, 720/50p (progressive) Before Using this Printer (1) (21 Languages), Paper Tray (1), Stopper (1), Cleaning Cartridge (1), USB Cable (1)	CD-ROM (1) (Operating Instructions (PDF) 21 Languages), Before Using this Printer (1) (21 Languages), Paper Tray (1), Stopper (1), HDTV IN/OUT signals 1080i/59.94i, 1080/50i (2:1 interlace) 720/59.94p, 720/50p (progressive) Cleaning Cartridge (1)

* Measured in high-speed mode when using the UPC-21S Colour Printing Pack (excluding data transfer time)

Optional Accessories

UPC-21S Colour Print Pack (S size)

Contents:
240 sheets of print paper
(80 sheets x 3 packs)
3 rolls of ink ribbon

UPC-21L Colour Print Pack (L size)

Contents:
200 sheets of print paper
(50 sheets x 4 packs)
4 rolls of ink ribbon

UPC-24SA Self-Laminating Colour Printing Pack (S size)

Contents:
180 sheets of print paper
(60 sheets x 3 packs)
3 rolls of ink ribbon

UPC-24LA Self-Laminating Colour Printing Pack (L size)

Contents:
160 sheets of print paper
(40 sheets x 4 packs)
4 rolls of ink ribbon

RM-91 Remote Commander

RM-5500 Remote Control Unit

FS-24 Foot Switch

The UP-D25MD and UP-25MD are produced at Sony EMCS Corporation Tokai Tec, which has received ISO14001 Environmental Management System certification.
